Whether you're an experienced participant in the fund finance space or a new entrant to the market, Conyers has the capabilities required to assist you and your onshore legal counsel with the Cayman Islands aspects of your fund finance transaction.

Conyers takes an integrated approach to fund finance with our team comprised of both fund finance and fund formation practitioners working seamlessly together. Our dedicated team regularly acts as lender or borrower side Cayman counsel on a diverse range of fund finance transactions including:

- subscription line facilities
- NAV' or asset-based facilities
- hybrid facilities
- facilities to open-ended funds in respect of redemption liquidity
- bespoke or specialist loans to fund structures

Our expertise is exceptional as our attorneys have been advising on these structures since their initial inception and subsequent evolution. Also, the diverse nature of our funds practice gives us a deep understanding of and insight into the key factors influencing these transactions from both a lender and borrower perspective.

Our team primarily acts on the lender side of fund finance transactions and we pride ourselves on our efficient and commercial representation. Our wealth of experience and integrated approach allows us to handle challenging transactions and minimise unnecessary conflict with borrower counsel to ensure a seamless client experience.

As one of the leading Cayman Islands legal advisors to private equity and venture capital funds, we also regularly advise on the fund/borrower side of fund finance transactions with such advice commencing at fund formation.

We are ideally placed to advise you from a Cayman Islands perspective on all aspects of the fund finance market and to assist you in tailoring and effecting bespoke and sophisticated fund financing solutions.
